Art Unit: 2892

Application/Control Number: 10/589,390

Art Unit: 2892

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species I, Claims 1-22.

II. Species II, Claims 23, 25-28, 30 and 32-33.

III. Species III, Claims 24, 29, 31 and 34.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. For example, a step of immersing a substrate in an oxidizing solution containing an active oxidizing species for direct oxidation of the substrate of Group I is not cited in Group II and Group III and a step of bringing a semiconductor in contact with an oxidizing solution below or excess of azeotropic concentration or a gas of Group II is not cited in Group I and Group III and a step of reacting an oxidizing solution of a low concentration or a high concentration or a gas of Group II is not cited in Group I and Group II. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U. S. C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, none of the claims is generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or species are likely to raise different non-prior-art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traverse (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out

Art Unit: 2892

supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now or record showing the species to be obvious variants or clearly admit on the record that this is a case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U. S. C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C. F. R. 1.141.

However, the issues of species I, II and species III claims are divergent.

Furthermore, there may be some overlap in the searches of the two groups, but there is no reason to believe that the searches would be identical. Therefore, based on the additional work involved in searching and examination of the two inventions together, restriction of distinct inventions is clearly proper.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

3. Any inquiry concerning this communication or earlier communication from the examiner should be direct to Phuc T. Dang whose telephone number (571) 272-1776. The examiner can normally be reached on Monday through Friday from 8.00am to 5.00pm.
